UNSC FLEET BOX

The stalwart United Nations Space Command (UNSC) is humanity's last hope for survival against the genocidal alien empire known as the Covenant. Holding the line is the UNSC Navy, and inside this box you will find models and components that allow players to either start a new **Halo: Fleet Battles** UNSC fleet, or expand an existing armada. This set includes two Epoch-class Heavy Carriers, four Marathon-class Heavy Cruisers and thirty Paris-class Frigates. In addition, the legendary Lord Hood and AI Cortana enter battle as a Fleet Commander and Heroic Character, ensuring the Covenant will not win this war without a fight. If bought to start a new UNSC fleet, players will also need the UNSC Commander Box (**HFUN04**).
